Gholbimand

Horribly, horribly underrated. Considering how terrible most of the Genesis material after Duke was, this is not only a genuinely excellent record but a return to form after nearly two decades of embarrassing soft rock. Ray Wilson's voice is stunning and brilliantly suited to the darker tones of what is essentially a complex, sinister breakup album. It's a shame that, because this came so late in Genesis' genesis (ahem), it tends to be discounted - as on the Platinum Collection, to which this LP's title track is welded with no regard to chronology as an afterthought. In truth, this is probably their

strongest work since 1978. It even managed to produce three solid pop singles without selling its soul. Which is something one wouldn't expect from the band that released 'Illegal Alien' and 'I Can't Dance' and 'Invisible Touch' and, erm, well. The record is highly reminiscent of some of their best synth work and song construction, but without sounding watered-down or ersatz. This vinyl edition is particularly nice, with its gatefold and etching. It's quite a good pressing, too.

Agree. It's really a good work, though not comparable to any other album so far. It has got shadows, but much more lights than 'We can't dance'. And as you said, even the singles and B-sides have something collectable. My favourite single is 'Not about us'. Less Genesis, more Wilson if you ask me. And my favourite B-Side is 'Banjo Man', which had to be taken out, for it does not have the dark atmosphere of the album. Just a very good fun-song. Would have liked to listen to another album, but Ray was obviously a victim of the former success. Marillion showed that it is possible to start a completely new thing. Genesis depended on Mr. Collins and behaved like very very old men when kicking Ray out...

Very well thought out review and I couldn't agree more. Awesome record I often listen to since its release.

GAZANIK

You couldnt be more right. This is a great album. Along with its B-sides the 19 songs they recorded during this time are fantastic. Now if I could only get my hands on a vinyl copy at a reasonal price. Great review. I give the album a 4/5 starts simply because they could have included some of the B-side and replaced some of the others, particularly "If Thats What You Need". A nice song but "Anything Now", "Sign your Life away" and "Phrett" would have suited the CD better I think.
