Comments about [Monolith Of Phobos](#) - The Claypool Lennon Delirium

Yggdi

My copy has a bit of green on disk 1, and it seems that I'm the minority. Anyone else have some green in their pressing?

Iraraeal

Music is great. Pressing is not. Another disappointment from United Record Pressing. Both records are warped and pressed off center. We need to refuse this low level of quality from United. Otherwise, they will continue to make money putting out flawed, sub-standard records.

Arith

My copy is bright orange lol. I don't think they figured out how to make gold.

Crazy

Anyone Who likes this album should definitely check out Lennon's band "the ghost of a sabertooth tiger" and their album "midnight sun"

Dilkree

top notch pressing , sounds terrific !!! Very impressed with that record , everything about it is totally awesome ... do not hesitate , Get it !!!

Windbearer

Just finished first listen on vinyl, ATO0308. incredible. Great art, yellow marble vinyl so sick. I'm glad this is happening to me,

Gaiuuaco

A strange pressing:side A is full of ticks and pops from start to finish, side B C D plays perfect (!

)Does anyone have the same problem?

Mr_Mix

I will be spinning this a lot! I purchased this off Amazon and I'm pleased with it! Surface noise is minimal to none and my copy isn't warped in the slightest. The only downside for me, with this release, is the generic, unlined, white inner sleeves. The color of the vinyl is a marbled (pleasant surprise) orange-yellow.

Trex

Maybe the illustration has been desaturated by a droid or a goblin. Hehehe. My runout etchings do match the golds but not the illustration here.

interactive man

Mine too is a marbled orange and definitely no colors in this vinyl that are illustrated in the gold pictured. The sticker says gold vinyl though so I guess it's gold vinyl. Regardless-vinyl is beautiful and the music even more so!!

Nahn

The color of the vinyl is described by the sticker as gold but it has no metallic luster and is a goldenrod yellow.

Dawncrusher

after first listen , it feels heavy on the claypool, however I'm not familiar with lennons work. can definitely tell who his father was. enjoy the choirs. stand out song was bubbles burst. I'm sure I'll get to know this one.

YSOP

If you find yourself enjoying what Sean brings to the table, check out "The Ghost of a Sabre Tooth Tiger" which is predominantly his project. An outstanding album which channels some of what his dad was up to in the mid-60's.

Kaim

The first copy I purchased was a terrible pressing. LP1 was warped, LP2 was pressed off centre and has a significant scratch on side 3. The circumferences of the records were quite jagged. Not sure where these were pressed but very poor quality. I contacted ATO records and they have offered to replace.
